DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishii Hiroshi (JP 61-227692).

Regarding claim 10, Hiroshi discloses a method for controlling an electronic device, comprising:

controlling an image sensor (optical head 1, figs. 1 and 2, page 1, constitution); and performing servo control of a drive device (motor 4) that drives a carriage (3) on which the image sensor is mounted, the servo control being performed based on servo control information read by at least one servo control sensor (speed sensor 5) mounted on the carriage together with the image sensor (page 1, Purpose and Constitution).

Allowable Subject Matter

Claims 1-4 and 9 are allowed. The prior art does not disclose "...an image sensor having an effective pixel region and a dummy pixel region; and a servo controller configured to perform servo control of a drive device that drives a carriage based on servo control information read by at least a portion of the dummy pixel region."

Art Unit: 2625

Claims 5-8 are allowed. The prior art does not disclose "...an electronic device, comprising: an image sensor having an effective pixel region and a dummy pixel region; at least one servo control sensor; and a servo controller configured to perform servo control on the drive device based on servo control information read by the at least one servo control sensor."
